

Silicon Protocol

What is Silicon Protocol?

Silion Protocol is Complete Decentralized Defi Platform on Binance Smart Chain Explore the DeFiverse in the New Way.

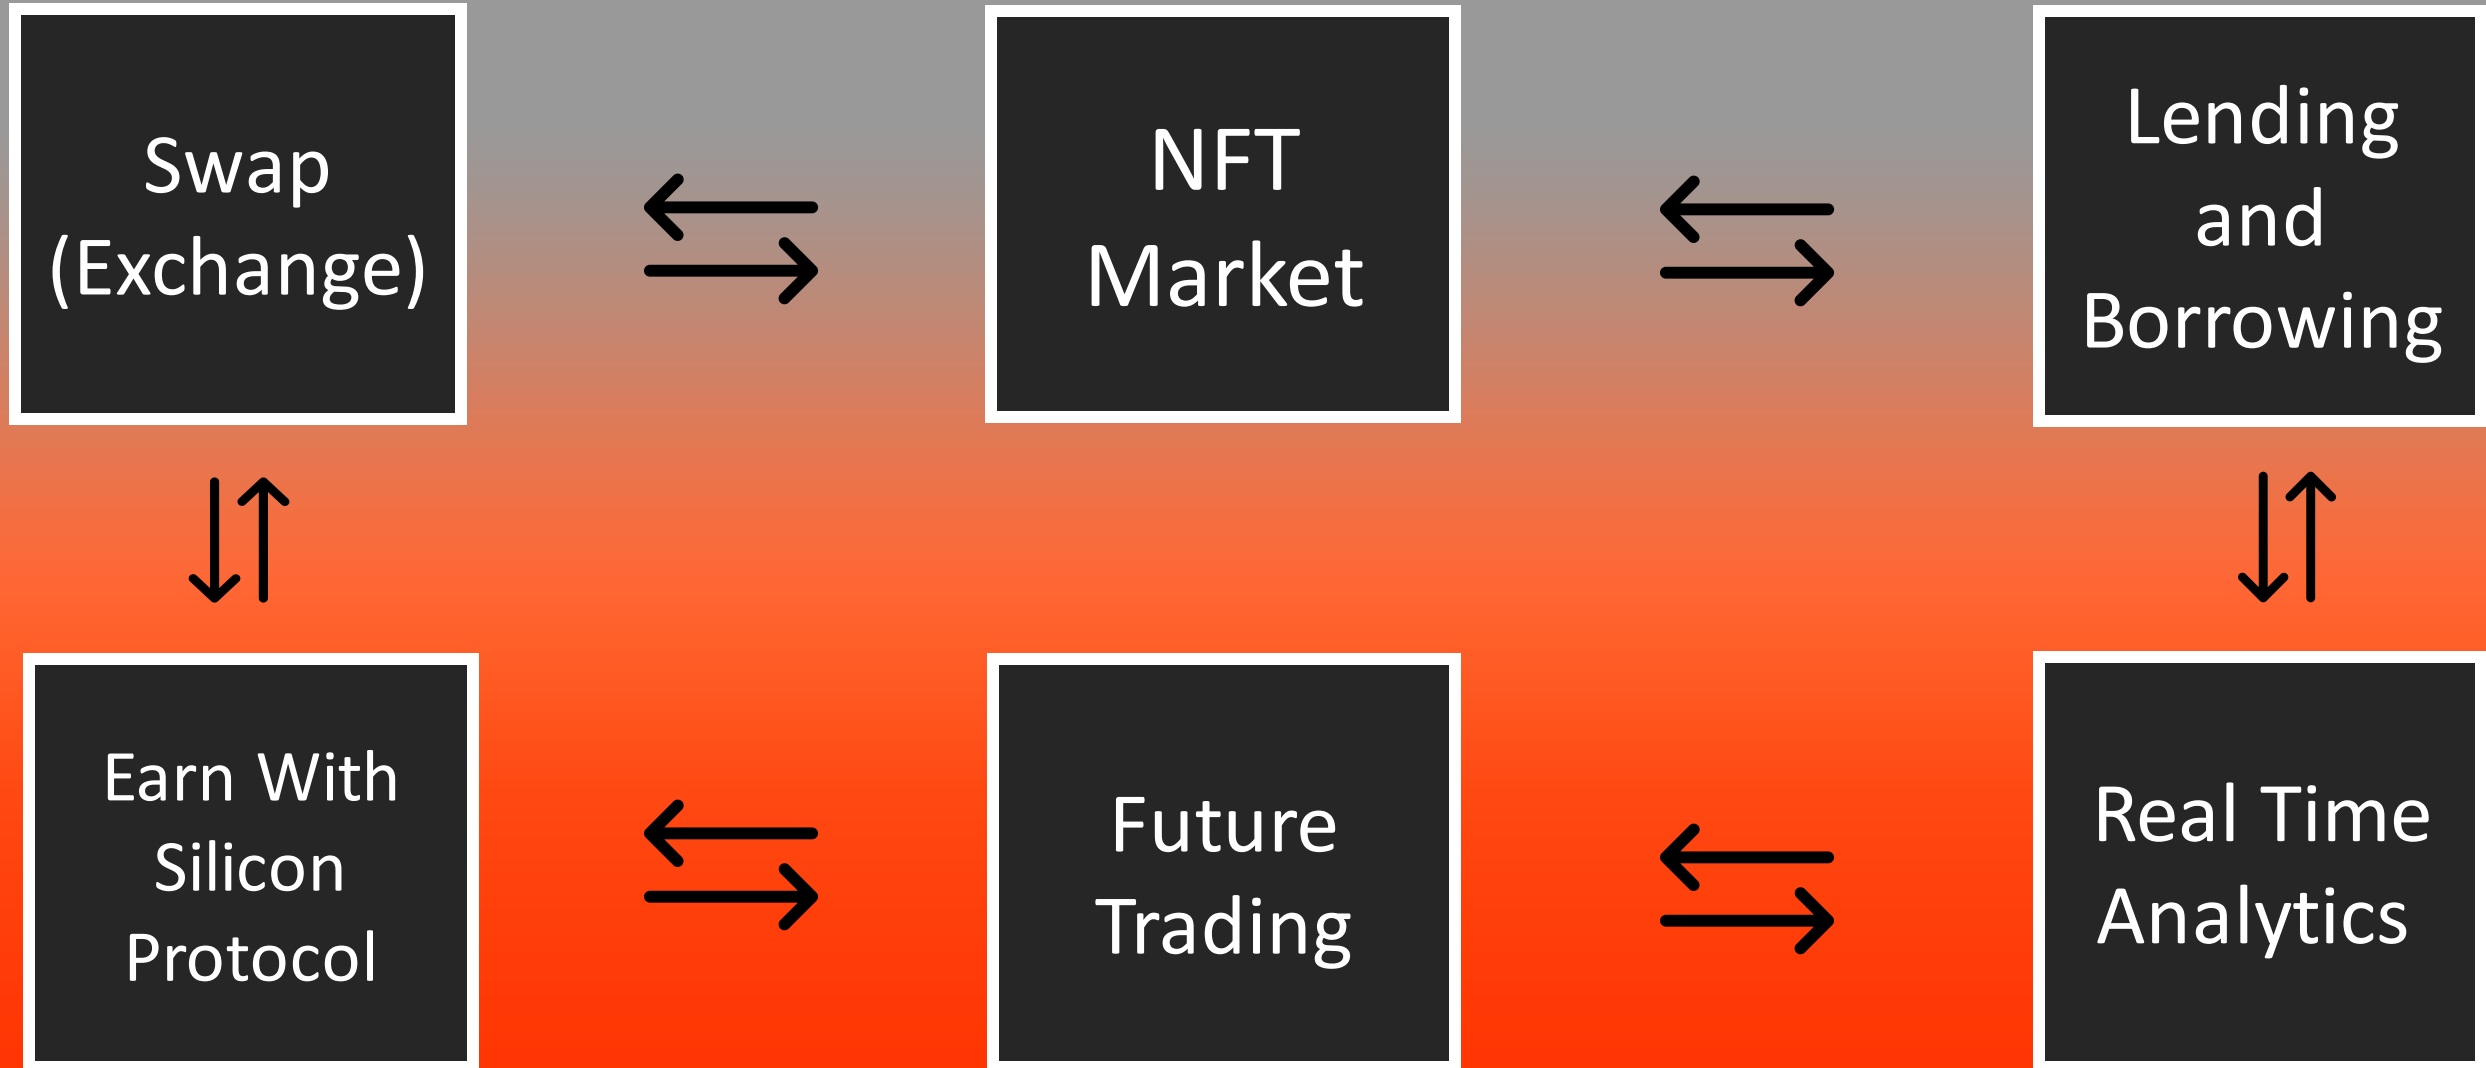

In the current DeFi ecosystem, liquidity is added and owned by users, who often easily leave one protocol for another that offers better rewards, thus creating unstable liquidity on DeFi protocols.

DeFi also faces tensions with stablecoins, which are absolutely essential to the system, but come with some big problems. Silicon Protocol offer solutions to these issues.

The Complete Ecosystem

Silicon SWAP

Safe

Fast

Scalable

Exchange Two Tokens Quickly using SiliconSwap

Trading on SiliconSwap does not involve a sign-up process
Trade Directly from Your Crypto Wallet

Use Limit Orders (set the maximum or minimum price at which you are willing to complete the transaction, it will Complete when Token hit your set price)

At launch, users can access the protocol via a dedicated web app and can be Connected with any wallet supported by WalletConnect (coming soon on SiliconProtocol.com DeFi Wallet.

Futures on DEX

Enjoy the Futures on Dex, Future trading is available on Silicon Protocol with the Supported BSC(BEP-20) tokens.

Hedging and risk management:
Short exposure: traders can bet against an asset's performance even if they don't have it.

Leverage: traders can enter positions that are larger than their account balance.

Earn With Silicon Protocol

Silicon Protocol offers its users secure & flexible ways to generate extra income while having full control over your assets -

Staking - The Best way to earn is Simply Put your tokens on staking and earn tokens :- Stake \$SCON and earn extra \$SLPT tokens everyday while you sleep .

LP Farming - It allow users to make money while supporting Platform by staking LP Tokens. Unlike Staking Pools Farming require you to stake two tokens to get LP Tokens, which you then stake in the Farm to earn rewards.

NFT Staking – Users Earn \$SCON tokens by Staking Silicon Protocol NFTs (The Higher Power your NFT is, higher rewards you will generate)

Lending and Borrowing

Users can instantly get a loan and start investing just by providing some collateral. Before borrowing or lending, understand the below terms

Lending is the process of depositing tokens to a lending network. In exchange for providing liquidity to the lending network, users receive interest on the tokens they have deposited. The interest comes from other users who are paying interest to borrow tokens, Lenders Can withdraw their tokens at any time.

Borrowing is the act of taking a loan from a lending network. Contrary to lending, which has users supplying tokens to a pool of assets, borrowing is the act of taking tokens out of the pool of assets. Taking loan requires users to lend tokens before borrowing, also known as overcollateralization.

NFT Market

NFT marketplaces are your path to start investing in digital assets, collectibles, and art, but there are lots of options out there. But Silicon Protocol Offers Most Secure NFT Market, Users Can Buy/Sell NFTs With Having Full Control.

Silicon Protocol Will make it as easy as possible to buy and sell NFTs on the platform. Integrated with Binance Smart Chain. User Earn \$SCON tokens for Each Transaction on Silicon Protocol's NFT MarketPlace.

REAL TIME ANALYTICS

Silicon Protocol uses the concept of price patterns from the past and technical indicators to analyse the chart and predict the future movements in price of coins.

Track Crypto Coins using our Platform with real time analytics chart Silicon Protocol Supports analysis and monitoring on the blockchain, bringing best-in-class risk management.

It should be noted that no technical indicator is correct 100% of the time. Even when multiple indicators converge on the same conclusion, prices could still react differently than expected. The best we can hope for is an increased chance of making a decision they feel good about, based on available information.

Tokenomics

\$SCON is Governance token of Silicon Protocol that Powers the Ecosystem. It is designed to Simplify the decentralized initiative of the protocol.

Token Allocation	Amount	%	Vesting
Free IDO	100,000,000	10%	100% Unlock at TGE
Partners	80,000,000	8%	4M Cliff 12M Linear
Liquidity	100,000,000	10%	LP
Ecosystem	500,000,000	50%	-
Team	100,000,000	10%	6M Cliff 12M Linear
Advisors	70,000,000	7%	4M Cliff 12M Linear
Marketing	50,000,000	5%	1M Cliff 12M Linear

Total Supply – 1 Billion \$SCON (BEP-20)
TGE Price – \$0.10

Roadmap

Phase - 1

Concept Projection - ✓
Social Handles Manifestation - ✓
WhitePaper Presentation - ✓
Tokenomics release - ✓
Free \$SCON IDO Community Round
Strategic Private IDO round
Marketing Campaigns

Phase - 2

Launch Protocol
Listing on DEX
Listing on tier one CEX
SCON Distribution
Release data analysis and tracking platform
Begin Staking and Farming

Phase - 3

NFT Market Development
Implement Futures in Platform
Release All Features and Tools
New CEX Listings
Continue Building...
